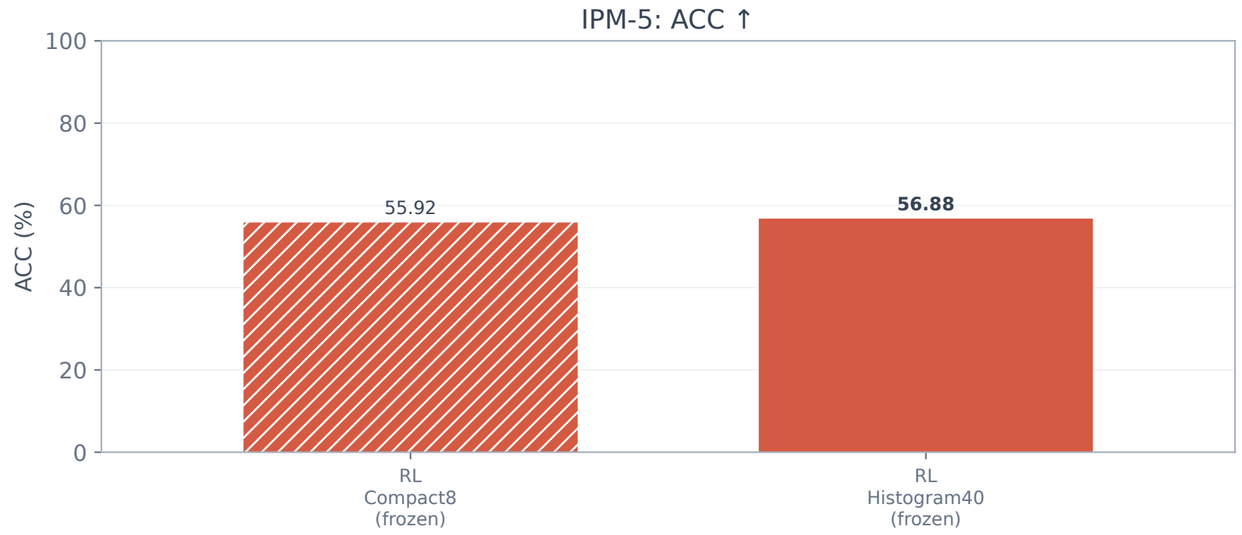
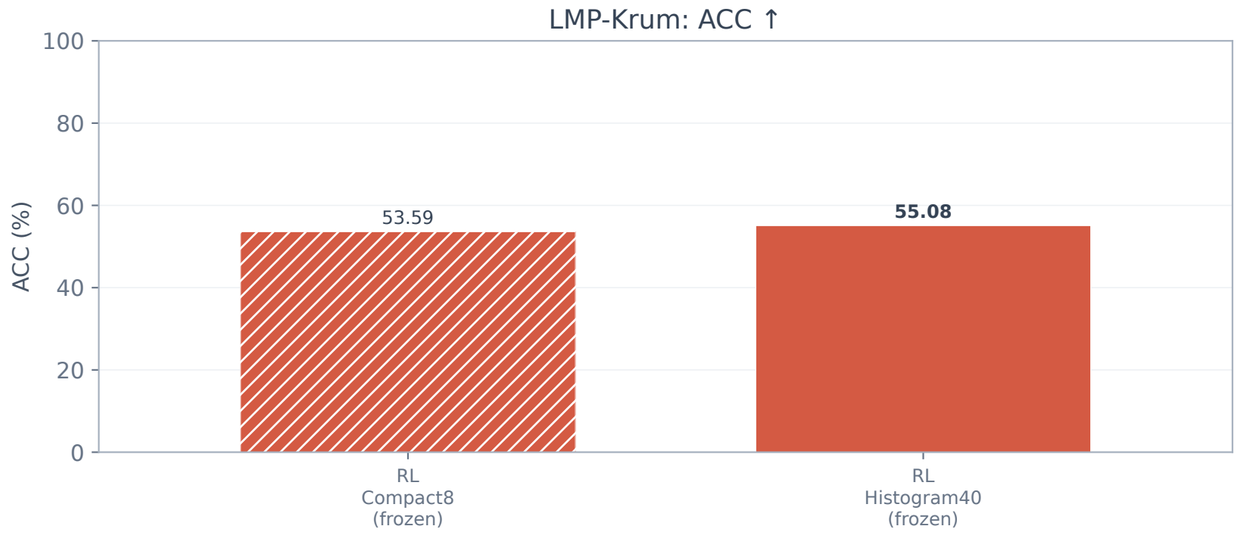
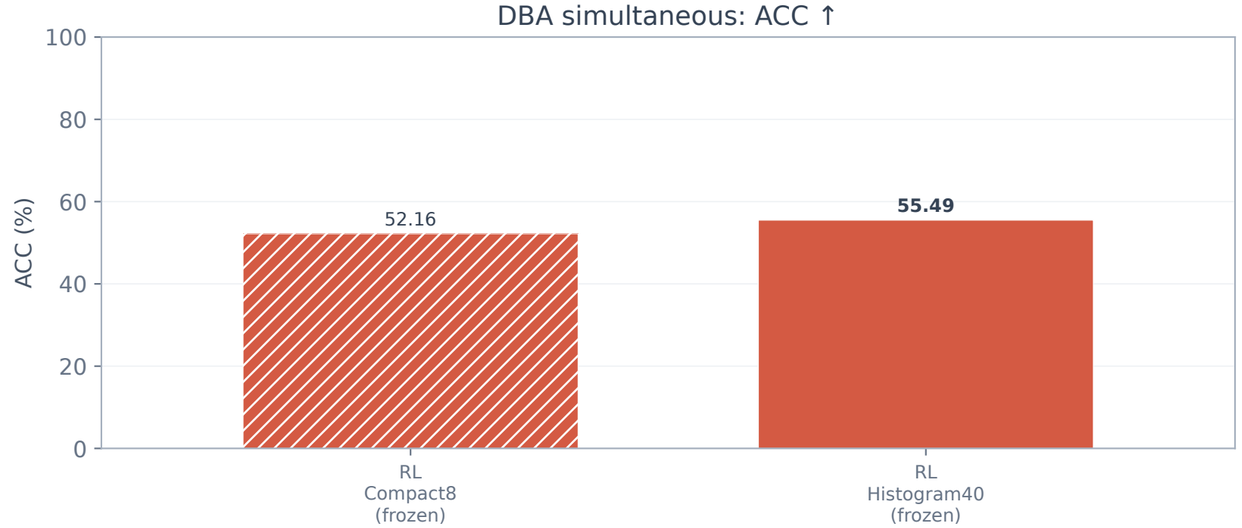
CIFAR-10: frozen Compact8 / Histogram40 | attack onset = round 1

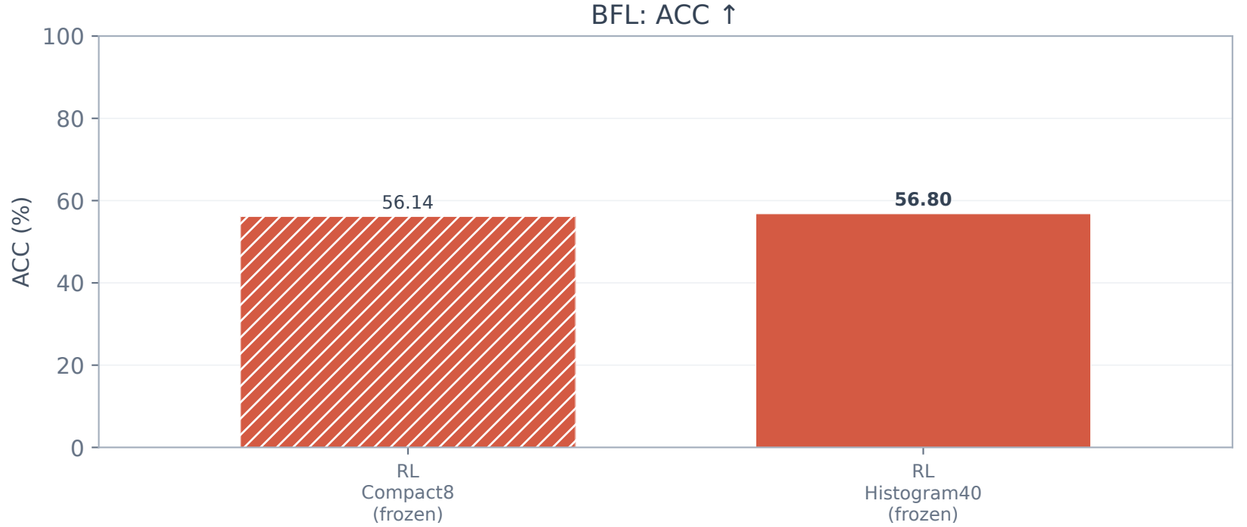
CIFAR10CNN | IID | 100 clients / 10 sampled | SGD 1 step, batch 128, lr 0.05 | 500 FL rounds | seed 43

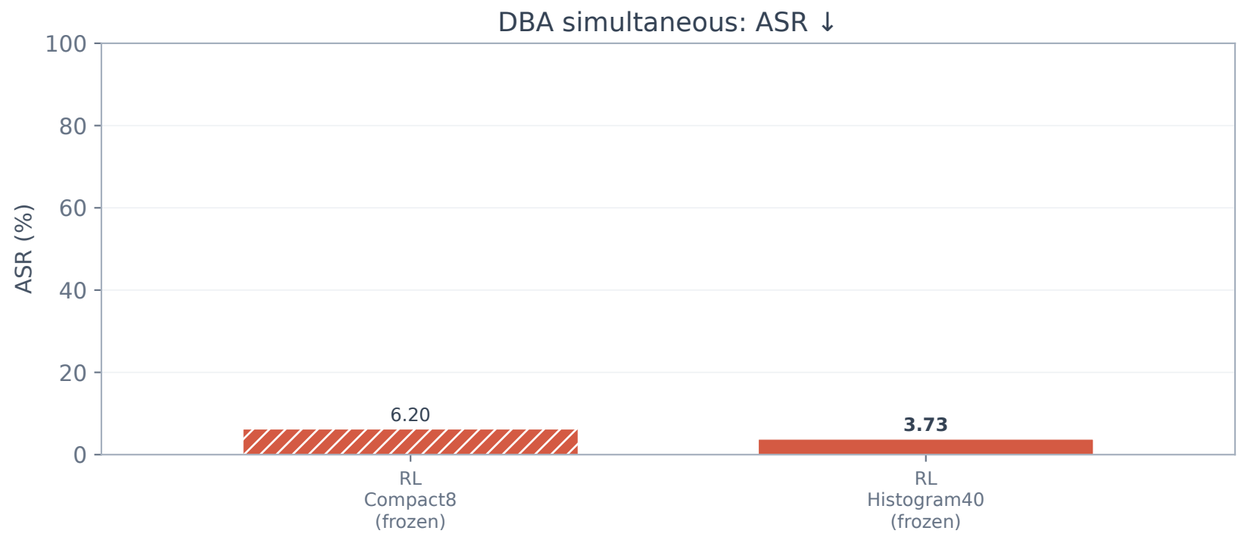
20 malicious identities for IPM/LMP; 5 for DBA/BFL | root: 200 samples / 5 steps | measured rounds 498–500 mean

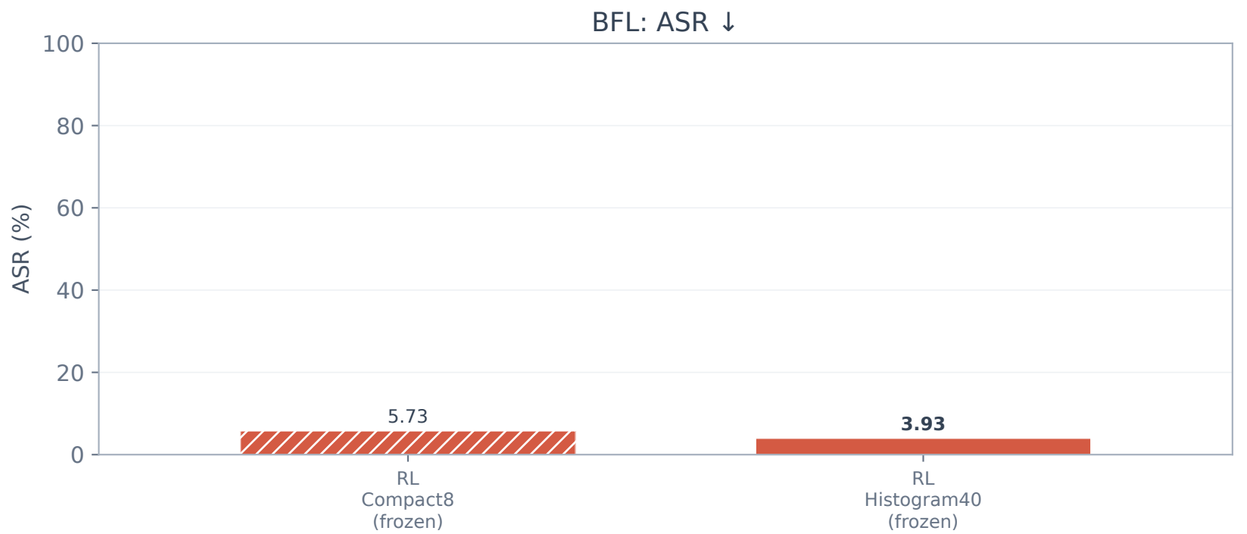












RL: same deterministic evaluation batch; Compact8 hatched, Histogram40 solid. Frozen training statistics; no deployment learning.

Compact8 and Histogram40: same attack-start=1 deployment protocol; one evaluation seed.
